

Durable technology meets modern design

Abox 100 and GEOS system available in black

Schalksmühle, 28.10.2025. With the new black version of the proven Abox 100 and the GEOS system also available in black, Spelsberg expands its portfolio with enclosure solutions that meet high demands in design, technology, and functionality. Especially for installations that should blend inconspicuously into the overall appearance, the products impress in their new color scheme. The black color adapts optimally to dark installation environments such as ceilings and walls – ideal for locations like shops, cinemas and theaters, or retail spaces with high design requirements for installations.

While the black Abox 100 is a reliable solution for protected outdoor installations and indoor use, the GEOS system in black is available for use in demanding environments such as unprotected outdoor areas. Even under changing weather conditions, the enclosure retains its rich color. Besides the design-oriented structure, the enclosures are VDE- and DLG-tested and offer comprehensive protection with high protection rating IP66 against dust and powerful water jets. Thus, the products offer a decisive advantage for use in unprotected or protected outdoor areas.

Robust technology for demanding environments

Technically, the enclosure solutions impress with numerous features that facilitate installation for installers and planners. The soft entry membranes enable quick and uncomplicated installation. Even in demanding installations, such as airports, train stations, or production halls, the flexible mounting capability ensures smooth installation. The enclosures are also designed for conductor cross-sections up to 10 mm², thus providing ample space for powerful

electrical installations. Furthermore, the black models are UV- and ammonia-resistant, an important criterion for weather resistance in outdoor applications or agricultural operations. Thus, Spelsberg ensures that the products can be exposed to severe environmental influences over the long term.

The Abox series and GEOS systems in black offer numerous possibilities for electrical installations where high-quality technology and aesthetics are equally required. With the new black product line, Spelsberg demonstrates how safety and modern design can be harmonized for installations.

About Spelsberg

Spelsberg is one of the internationally leading manufacturers in the electrical industry and is primarily active in the field of electrical installation and enclosure technology. The family-owned company with around 600 employees develops, produces and sells products and systems for the electrical trade and industry and is regarded as a competent problem solver for all enclosure-related tasks. Spelsberg has stood for safety, high quality and technical performance for over 120 years and has its own VDE- and UL-certified test laboratories. The range includes over 5,000 widely available articles, including junction boxes, small distribution boards, terminal blocks, meter enclosures and industrial enclosures. Furthermore, the family-owned company develops, manufactures and markets enclosures as well as ready-to-wire systems tailored to customer-specific requirements. The enclosure specialist combines tradition and modernity: with the expansion into the e-mobility business sector, Spelsberg is positioning itself more broadly in the field of sustainable and forward-looking technologies.
