

Digital planning made easy

Product configurator for GEOS enclosure solutions from Spelsberg

Schalksmühle, 23.06.2026. With a digital tool, Spelsberg sets standards in the planning and customization of empty enclosures and switch cabinets. The innovative product configurator for the GEOS series offers customers an intuitive, practical way to efficiently develop tailor-made solutions.

The configurator guides users step by step through the extensive range of GEOS empty enclosures and switch cabinets. An integrated assistant provides helpful information and ensures that even complex configurations are implemented quickly and reliably. This allows accessories to be placed flexibly and combined into a custom solution. By precisely specifying drilled holes and milled cutouts, enclosures can be adapted exactly to project-specific requirements.

Transparency through comprehensive documentation

After completing the configuration, registered "meinspelsberg" users gain access to detailed documentation. This includes, among other things, a complete component list, dimensional and data sheets, certificates and assembly instructions. This is complemented by price information and ready-to-use tender texts. Registration in the service area also enables saving, loading and managing one's own projects as well as sharing configurations with Spelsberg's support team.

Seamless integration into existing processes

Thanks to an integrated ELBRIDGE interface to wholesalers, the configurator integrates seamlessly into existing processes. Users can access this directly from a wholesaler's online store, create a custom solution, and then automatically add all items to their shopping cart.

Easy start including support

For a quick start, Spelsberg provides supporting content that explains the key functions of the tool. These include, among other things, the first steps in the configurator, inserting accessories, saving and opening projects, as well as sending inquiries.

With the innovative product configurator, Spelsberg underlines its claim to consistently align digital solutions with users' needs – practical, efficient and future-oriented.

About Spelsberg

Spelsberg is one of the internationally leading manufacturers in the electrical industry and is primarily active in the field of electrical installation and enclosure technology. The family-owned company with around 600 employees develops, produces and sells products and systems for the electrical trade and industry and is regarded as a competent problem solver for all enclosure-related tasks. Spelsberg has stood for safety, high quality and technical performance for over 120 years and has its own VDE- and UL-certified test laboratories. The range includes over 5,000 widely available articles, including junction boxes, small distribution boards, terminal blocks, meter enclosures and industrial enclosures. Furthermore, the family-owned company develops, manufactures and markets enclosure as well as ready-to-wire systems tailored to customer-specific requirements. The enclosure specialist combines tradition and modernity: with the expansion into the e-mobility business sector, Spelsberg is positioning itself more broadly in the field of sustainable and forward-looking technologies.
