Spelsberg at GET NORD 2026

Solutions ranging from electrical installation and e-mobility to digital planning tools

Schalksmühle, 17.11.2026. At GET NORD 2026, Spelsberg will present solutions and new products relating to modern electrical installation in Hamburg from 19 to 21 November. The trade fair brings together the fields of electrical, sanitary, heating and air-conditioning technology, focusing, among other things, on connected building technology and solutions for the energy transition. Spelsberg will be represented in Hall B7, Stand P26, and Hall B5, Stand 221.

Among other things, Spelsberg's trade fair presentation focuses on the AK 24 and AK 36 small distribution boards. The manufacturer from Schalksmühle will also showcase its GEOS enclosures and cabinets. The highlights also include the Ventilation element BEL Air active, which will also be presented in black at the trade fair. With the black versions of Abox and GEOS, Spelsberg is also creating visual accents. In the field of WKE solutions, the expert in electrical installation and enclosure technology will present a new terminal. Another focus is on solutions for e-mobility and the energy transition. Here, the family-owned company will present the Spelsberg Wallbox Smart Pro and the AK E-Mobility distributors. The portfolio is rounded out by solutions for grid and system protection and the new Meter enclosure ZKi 14a for applications under Section 14a of the Energy Industry Act (EnWG).

Discover digital tools directly at the trade fair stand

In addition to the product solutions, visitors will gain insights into Spelsberg's digital offerings. The provider of innovative complete solutions will present various tools for planning and configuration. These include the Spelsberg

EasyPrint labelling configurator, the GEOS product configurator and the temperature-rise calculator. Alexander Schwarz, Regional Sales Manager Germany (North), and Michael Wrobel, Area Manager Hamburg/Schleswig-Holstein, will be available as contacts for personal discussions at GET NORD.

“With our exhibition stand, we are showing how broadly we cover the requirements of modern electrical installation. From proven enclosure and distributor solutions to current product innovations, we offer the electrical trade practical solutions for various applications,” says Alexander Schwarz. “The energy transition is also presenting electrical installation with new requirements. We look forward to showcasing specific solutions at GET NORD that can be used to implement charging infrastructure and applications under Section 14a in a practical manner,” concludes Michael Wrobel.

About Spelsberg

Spelsberg is one of the internationally leading manufacturers in the electrical industry and is primarily active in the field of electrical installation and enclosure technology. The family-owned company with around 600 employees develops, produces and sells products and systems for the electrical trade and industry and is regarded as a competent problem solver for all enclosure-related tasks. Spelsberg has stood for safety, high quality and technical performance for over 120 years and has its own VDE- and UL-certified test laboratories. The range includes over 5,000 widely available articles, including junction boxes, small distribution boards, terminal blocks, meter enclosures and industrial enclosures. Furthermore, the family-owned company develops, manufactures and markets enclosure as well as ready-to-wire systems tailored to customer-specific requirements. The enclosure specialist combines tradition and modernity: with the expansion into the e-mobility business sector, Spelsberg is positioning itself more broadly in the field of sustainable and forward-looking technologies.
