

KTB 2 from Spelsberg: Click instead of Screw

Tool-free mounting of enclosures from the Red Range on cable trays

Schalksmühle, 07.10.2025. With the KTB 2 cable tray fastener, Spelsberg offers a sophisticated, time-saving and convenient solution for the secure mounting of Red Series enclosures on cable support systems. Whether long slot or grid tray: The fastening element impresses with its tool-free installation and uncomplicated handling. The KTB 2 was specifically developed as a complement to the existing KTB 1: While the KTB 1 is suitable for applications with enclosures such as the Abox and can be used universally, the KTB 2 is designed specifically for the Red Range.

The KTB 2 enables quick and stable fastening of Red Range enclosures with external fastening tabs to cable tray systems with a 7 mm long slot width as well as to grid trays. The fastening element is easily secured to the cable tray with a quarter turn. The connection to the enclosure is then made by snapping on the external fastening tabs. No tools or additional fastening materials like cable tray screws are necessary.

Fast, uncomplicated, reliable

With KTB 2, the mounting of enclosures from the Red Range onto cable trays becomes significantly simpler and more efficient. Because the installation is quick and requires no additional tools or screws. This saves assembly time and costs. At the same time, the installation becomes more comfortable and safer due to easy handling. Even on fully occupied trays, the system saves valuable time and space since no free space must be created in the occupied cable tray

About Spelsberg

Spelsberg is one of the internationally leading manufacturers in the electrical industry and is primarily active in electrical installation and enclosure technology. The family-owned company, with approximately 600 employees, develops, produces and sells products and systems for the electrical trade and industry and is considered a competent problem solver for all tasks related to enclosures. Spelsberg stands for safety, high quality, and technical performance for over 120 years and has its own VDE and UL-certified test laboratories. The range includes over 5,000 widely available items, including junction boxes, small distribution boards, terminal, meter, and industrial enclosures. In addition, the family company develops, manufactures, and sells enclosures as well as ready-to-wire systems for customer-specific requirements. The enclosure specialist combines tradition and modernity: With the expansion into the e-mobility business sector, Spelsberg broadens its presence in the field of sustainable and future-oriented technologies.
